THE "PFLEGER" STRETCHER PIECES

These Stretchers are double mortised and tenoned, therefore very strong, and are able to warp out of shape in straining. The joint is reversible and interchangeable; hence, it would be impossible to select two pieces of a width which would not fit together readily and form a perfect joint. Both sides of the stretcher pieces are beveled inward from the outer edge, so that when put together either side can be mounted with canvas.

GÜNTHER WAGNER'S ALBUMEN SPOTTING OR RETOUCH COLORS DRYING WITH GLOSS

These colors are made to dry with a gloss to suit the high surface of the photograph.

Made in three shades White and three dark shades.

The Whites are used to produce pure white on the photo as required; a stroke with the brush across the photo with No. III White will produce white on dark parts. No. II on medium shades. White No. I shows more bluish on both like watered milk. This is an optical illusion and the right white must be chosen to get the desired white effect on the photo.

FOR THE BRUSH—READY FOR USE

Time and experience has proven that water colors are the most practical and satisfactory for show card writing.

Bissell's Colors have all the requirements to produce the most beautiful effects in show cards, containing all the adhesives for binder, etc., and ready for instant use, flowing from the brush with a smoothness that allows of very rapid work, but with "just the right pull."

MESSRS. FAVOR, RUHL & Co.:

DEAR SIR: I have been testing the sample of paper left here by your representative, and I find it very satisfactory, having a hard surface which will stand a great deal of work before it will give way in using the water and the bristle brush combined. It takes the wash well also.

If the paper which is called the *Unbleached Arnold* is up to this sample, it should fill every requirement.

Yours very truly,

(Signed)

HENRY B. SNELL.
